Subject Index

Acetone
Reaction of 2-propanol over heteropolyacids after pretreatment in air 133

Acrolein formation
Formation of acrolein by the reaction of formaldehyde with ethanol 123

Active sites
Improvements to Raney copper methanol synthesis catalysts through zinc impregnation. I Electron microprobe analysis 75

Adsorption
Effect of chromium addition on the behaviour of iron/activated carbon catalysts for carbon monoxide hydrogenation 95

Adsorption reaction
TAP reactor investigation of methane coupling over samarium oxide catalysts 45

Alkali promoter (loss)
Comparative loss of alkali promoter by desorption from two catalysts for the dehydrogenation of ethylbenzene to styrene 235

Alkenes
Catalytic activity and product distribution in the cracking of C_6–C_8 alkenes on the ammonium salt of 12-tungstophosphoric acid 251

Alumina
Influence of metal loading on the reducibility and hydrogenation activity of cobalt/alumina catalysts 223

Aluminium
Gallium, aluminium, and mixed gallium–aluminium pillared montmorillonite. Preparation and characterization 303

Aluminophosphate
High resolution solid-state ^1H nuclear magnetic resonance spectra of organic template in hydrated aluminophosphate VPI-5 L1

Ammonium 12-tungstophosphate
Catalytic activity and product distribution in the cracking of C_6–C_8 alkenes on the ammonium salt of 12-tungstophosphoric acid 251

Aromatic compounds
Slurry-phase hydrogenation of aromatic compounds over supported noble metal catalysts 283

Automotive catalysts
Effects of sulfur on noble metal automotive catalysts 175

Benzene
Oxidative dehydrogenation of propane in lithium hydroxide/lithium iodide melts 163

Bimetal
Combinations of platinum and palladium on alumina supports as oxidation catalysts 9

Binding agent
Effect of the binding agent on the catalytic activity and thermal stability of granulated spinel catalysts 67

Carbon
Nature of the catalytically active carbonaceous sites for the oxydehydrogenation of ethylbenzene to styrene: A brief review 1

Carbon monoxide chemisorption
Effect of chromium addition on the behaviour of iron/activated carbon catalysts for carbon monoxide hydrogenation 95

Carbon monoxide hydrogenation
Carbon monoxide hydrogenation on Co/Al_2O_3 and Co/NaX catalysts 21

Carbon monoxide hydrogenation
Liquid phase Fischer–Tropsch synthesis on manganese-promoted ultrafine particles of iron as a catalyst 37

Carbon monoxide hydrogenation
Effect of chromium addition on the behaviour of iron/activated carbon catalysts for carbon monoxide hydrogenation 95

Carbon monoxide oxidation
Effects of sulfur on noble metal automotive catalysts 175

Catalyst characterization (EPMA)
Improvements to Raney copper methanol synthesis catalysts through zinc impregnation. I Electron microprobe analysis 75

Catalyst characterization (hydrogen chemisorption, TPR, XRD)
Carbon monoxide hydrogenation on Co/Al_2O_3 and Co/NaX catalysts 21

Catalyst characterization (in-situ Raman spectrometry)
In situ Raman investigation of hydrodesulphurization catalysts 243

Catalyst characterization (MAS-NMR)
Multinuclear high-resolution solid-state nuclear magnetic resonance studies of amorphous silica-aluminas 149

Catalyst characterization (Mass spectrometry, molecular beam)
Comparative loss of alkali promoter by desorption from two catalysts for the dehydrogenation of ethylbenzene to styrene 235
Catalyst characterization (MES, TG-DTG, TPD, TPR, TPSR, XPS, XRD)
Role of rare earth oxides and thoria as promoters in precipitated iron-based catalysts for Fischer–Tropsch synthesis 109
Catalyst characterization (TPR)
Influence of metal loading on the reducibility and hydrogenation activity of cobalt/alumina catalysts 223
Catalyst characterization (TPR, XPS, XRD)
Characterization of a potassium-promoted cobalt–molybdenum/alumina water–gas shift catalyst 187
Catalyst performance
Cumene disproportionation over zeolite β. I. Comparison of catalytic performances and reaction mechanisms of zeolites 199
Catalyst preparation (pillaring)
Synthesis and characterization of titanium pillared clays. Influence of the temperature of preparation 269
Catalyst preparation (wet impregnation)
Effects of hydroxylation of a silica surface on the metal dispersion in supported platinum catalysts 141
Chromium
Effect of chromium addition on the behaviour of iron/activated carbon catalysts for carbon monoxide hydrogenation 95
Cobalt
Influence of metal loading on the reducibility and hydrogenation activity of cobalt/alumina catalysts 223
Cobalt oxide
Carbon monoxide hydrogenation on Co/Al_2O_3 and Co/NaX catalysts 21
Cobalt-molybdenum/alumina
Characterization of a potassium-promoted cobalt–molybdenum/alumina water–gas shift catalyst 187
Cobalt–molybdenum/alumina
In situ Raman investigation of hydrodesulphurization catalysts 243
Cobalt/alumina
Carbon monoxide hydrogenation on Co/Al_2O_3 and Co/NaX catalysts 21
Cobalt/NaX
Carbon monoxide hydrogenation on Co/Al_2O_3 and Co/NaX catalysts 21
Coke
Nature of the catalytically active carbonaceous sites for the oxydehydrogenation of ethylbenzene to styrene: A brief review 1
Copper–cobalt
Effect of the binding agent on the catalytic activity and thermal stability of granulated spinel catalysts 67
Cracking
Catalytic activity and product distribution in the cracking of C_6–C_8 alkenes on the ammonium salt of 12-tungstophosphoric acid 251
Cumene disproportionation
Cumene disproportionation over zeolite β. I. Comparison of catalytic performances and reaction mechanisms of zeolites 199
Cumene disproportionation
Cumene disproportionation over zeolite β. II. Stability enhancement with silica deposition and steam pretreatment 209
Dehydrogenation
Reaction of 2-propanol over heteropolyacids after pretreatment in air 133
Diisopropylbenzene
Cumene disproportionation over zeolite β. I. Comparison of catalytic performances and reaction mechanisms of zeolites 199
Ethanol
Formation of acrolein by the reaction of formaldehyde with ethanol 123
Ethylbenzene
Nature of the catalytically active carbonaceous sites for the oxydehydrogenation of ethylbenzene to styrene: A brief review 1
Ethylbenzene dehydrogenation
Comparative loss of alkali promoter by desorption from two catalysts for the dehydrogenation of ethylbenzene to styrene 235
Excited states
Comparative loss of alkali promoter by desorption from two catalysts for the dehydrogenation of ethylbenzene to styrene 235

Fischer–Tropsch synthesis
Role of rare earth oxides and thoria as promoters in precipitated iron-based catalysts for Fischer–Tropsch synthesis 109
Fischer–Tropsch synthesis
Liquid phase Fischer–Tropsch synthesis on manganese-promoted ultrafine particles of iron as a catalyst 37
Fischer–Tropsch synthesis
Influence of metal loading on the reducibility and hydrogenation activity of cobalt/alumina catalysts 223
Formaldehyde
Multicomponent oxide catalysts for the oxidation of methanol to formaldehyde 55
Formaldehyde
Formation of acrolein by the reaction of formaldehyde with ethanol 123
Gallium
Gallium, aluminium, and mixed gallium–aluminium pillared montmorillonite. Preparation and characterization 303
Gallium pillars
Gallium, aluminium, and mixed gallium–aluminium pillared montmorillonite. Preparation and characterization 303
Gallium–aluminium
Gallium, aluminium, and mixed gallium–aluminium pillared montmorillonite. Preparation and characterization 303
Granulated spinel catalysts
Effect of the binding agent on the catalytic activity and thermal stability of granulated spinel catalysts 67
Heteropoly acids
Catalytic activity and product distribution in the cracking of C_6–C_8 alkenes on the ammonium salt of 12-tungstophosphoric acid 251
Heteropolyacids
Reaction of 2-propanol over heteropolyacids after pretreatment in air 133
Hydrocarbon oxidation
Effects of sulfur on noble metal automotive catalysts 175
Hydrodesulphurization
In situ Raman investigation of hydrodesulphurization catalysts 243
Hydrothermal treatment
Combinations of platinum and palladium on alumina supports as oxidation catalysts 9
Hydroxylation
Effects of hydroxylation of a silica surface on the metal dispersion in supported platinum catalysts 141
Iodine
Oxidative dehydrogenation of propane in lithium hydroxide/lithium iodide melts 163
Iron
Role of rare earth oxides and thoria as promoters in precipitated iron-based catalysts for Fischer–Tropsch synthesis 109
Iron oxide
Comparative loss of alkali promoter by desorption from two catalysts for the dehydrogenation of ethylbenzene to styrene 235
Iron–chromium/ active carbon
Effect of chromium addition on the behaviour of iron/activated carbon catalysts for carbon monoxide hydrogenation 95
Leaching
Improvements to Raney copper methanol synthesis catalysts through zinc impregnation. I Electron microprobe analysis 75
Light-off temperature
Combinations of platinum and palladium on alumina supports as oxidation catalysts 9
Lithium hydroxide
Oxidative dehydrogenation of propane in lithium hydroxide/lithium iodide melts 163
Lithium iodide
Oxidative dehydrogenation of propane in lithium hydroxide/lithium iodide melts 163
Manganese–iron
Liquid phase Fischer–Tropsch synthesis on manganese-promoted ultrafine particles of iron as a catalyst 37
Metal–support interaction
Influence of metal loading on the reducibility and hydrogenation activity of cobalt/alumina catalysts 223
Methane coupling
TAP reactor investigation of methane coupling over samarium oxide catalysts 45
Methanol oxidation
Multicomponent oxide catalysts for the oxidation of methanol to formaldehyde 55
Methanol synthesis
Improvements to Raney copper methanol synthesis catalysts through zinc impregnation. II. Surface area development 89

Methanol synthesis
Improvements to Raney copper methanol synthesis catalysts through zinc impregnation. I Electron microprobe analysis 75
Microporosity
Catalytic activity and product distribution in the cracking of C_6–C_8 alkenes on the ammonium salt of 12-tungstophosphoric acid 251
Molecular sieves
High resolution solid-state ^1H nuclear magnetic resonance spectra of organic template in hydrated aluminophosphate VPI-5 L1
Molybdates
Multicomponent oxide catalysts for the oxidation of methanol to formaldehyde 55
Montmorillonite
Gallium, aluminium, and mixed gallium–aluminium pillared montmorillonite. Preparation and characterization 303
NaX
Carbon monoxide hydrogenation on Co/Al_2O_3 and Co/NaX catalysts 21
Nuclear magnetic resonance
High resolution solid-state ^1H nuclear magnetic resonance spectra of organic template in hydrated aluminophosphate VPI-5 L1
Nuclear mangetic resonance
Multinuclear high-resolution solid-state nuclear magnetic resonance studies of amorphous silica-aluminas 149
Oxidative dehydrogenation
Oxidative dehydrogenation of propane in lithium hydroxide/lithium iodide melts 163
Oxydehydrogenation
Nature of the catalytically active carbonaceous sites for the oxydehydrogenation of ethylbenzene to styrene: A brief review 1
Particle size
In situ Raman investigation of hydrodesulphurization catalysts 243
Phosphate
Nature of the catalytically active carbonaceous sites for the oxydehydrogenation of ethylbenzene to styrene: A brief review 1
Phosphorus
Multicomponent oxide catalysts for the oxidation of methanol to formaldehyde 55
Pillared clays
Gallium, aluminium, and mixed gallium–aluminium pillared montmorillonite. Preparation and characterization 303
Pillared clays
Synthesis and characterization of titanium pillared clays. Influence of the temperature of preparation 269
Platinum dispersion
Effects of hydroxylation of a silica surface on the metal dispersion in supported platinum catalysts 141
Platinum–palladium/alumina
Combinations of platinum and palladium on alumina supports as oxidation catalysts 9
Poisoning
Effects of sulfur on noble metal automotive catalysts 175
Potassium promotion
Characterization of a potassium-promoted cobalt–molybdenum/alumina water–gas shift catalyst 187
Promotion
Role of rare earth oxides and thoria as promoters in precipitated iron-based catalysts for Fischer–Tropsch synthesis 109
Propane
Oxidative dehydrogenation of propane in lithium hydroxide/lithium iodide melts 163
2-Propanol
Reaction of 2-propanol over heteropolyacids after pretreatment in air 133
Propene
Oxidative dehydrogenation of propane in lithium hydroxide/lithium iodide melts 163
Raney copper
Improvements to Raney copper methanol synthesis catalysts through zinc impregnation. II. Surface area development 89
Raney copper
Improvements to Raney copper methanol synthesis catalysts through zinc impregnation. I Electron microprobe analysis 75
Rare-earth oxides
Role of rare earth oxides and thoria as promoters in precipitated iron-based catalysts for Fischer–Tropsch synthesis 109

Reaction mechanism
Cumene disproportionation over zeolite β. I. Comparison of catalytic performances and reaction mechanisms of zeolites 199
Reducibility
Carbon monoxide hydrogenation on Co/Al_2O_3 and Co/NaX catalysts 21
Reduction
Characterization of a potassium-promoted cobalt–molybdenum/alumina water–gas shift catalyst 187
Salt melt
Oxidative dehydrogenation of propane in lithium hydroxide/lithium iodide melts 163
Samarium oxide
TAP reactor investigation of methane coupling over samarium oxide catalysts 45
Selectivity (formaldehyde)
Multicomponent oxide catalysts for the oxidation of methanol to formaldehyde 55
Silica
Effects of hydroxylation of a silica surface on the metal dispersion in supported platinum catalysts 141
Silica deposition
Cumene disproportionation over zeolite β. II. Stability enhancement with silica deposition and steam pretreatment 209
Silica–alumina
Multinuclear high-resolution solid-state nuclear magnetic resonance studies of amorphous silica-aluminas 149
Slurry-phase hydrogenation
Slurry-phase hydrogenation of aromatic compounds over supported noble metal catalysts 283
Stability enhancement
Cumene disproportionation over zeolite β. II. Stability enhancement with silica deposition and steam pretreatment 209
Steam pretreatment
Cumene disproportionation over zeolite β. II. Stability enhancement with silica deposition and steam pretreatment 209
Styrene
Nature of the catalytically active carbonaceous sites for the oxydehydrogenation of ethylbenzene to styrene: A brief review 1
Styrene
Comparative loss of alkali promoter by desorption from two catalysts for the dehydrogenation of ethylbenzene to styrene 235
Sulphidation
Characterization of a potassium-promoted cobalt–molybdenum/alumina water–gas shift catalyst 187
Sulphur
Effects of sulfur on noble metal automotive catalysts 175
Supported noble metals
Slurry-phase hydrogenation of aromatic compounds over supported noble metal catalysts 2 83
Surface area
Improvements to Raney copper methanol synthesis catalysts through zinc impregnation. II. Surface area development 89
Syngas conversion
Liquid phase Fischer–Tropsch synthesis on manganese-promoted ultrafine particles of iron as a catalyst 37
TAP reactor
TAP reactor investigation of methane coupling over samarium oxide catalysts 45
Temperature effect
Synthesis and characterization of titanium pillared clays. Influence of the temperature of preparation 269
Temporal analysis of products
TAP reactor investigation of methane coupling over samarium oxide catalysts 45
Thallium
Multicomponent oxide catalysts for the oxidation of methanol to formaldehyde 55
Thermal stability
Effect of the binding agent on the catalytic activity and thermal stability of granulated spinel catalysts 67
Titanium
Synthesis and characterization of titanium pillared clays. Influence of the temperature of preparation 269
Tungstophosphoric acid
Catalytic activity and product distribution in the cracking of C_6–C_8 alkenes on the ammonium salt of 12-tungstophosphoric acid 251

Ultrafine particle catalyst
Liquid phase Fischer–Tropsch synthesis on manganese-promoted ultrafine particles of iron as a catalyst 37
VPI-5
High resolution solid-state ^{1}H nuclear magnetic resonance spectra of organic template in hydrated aluminophosphate VPI-5 L1
Water–gas shift reaction
Characterization of a potassium-promoted cobalt–molybdenum/alumina water–gas shift catalyst 187
Xylene oxidation
Combinations of platinum and palladium on alumina supports as oxidation catalysts 9
Zeolite β
Cumene disproportionation over zeolite β. I. Comparison of catalytic performances and reaction mechanisms of zeolites 199
Zeolite β
Cumene disproportionation over zeolite β. II. Stability enhancement with silica deposition and steam pretreatment 209
Zeolites
Carbon monoxide hydrogenation on Co/Al_2O_3 and Co/NaX catalysts 21
Zinc
Improvements to Raney copper methanol synthesis catalysts through zinc impregnation. II. Surface area development 89
Zinc
Improvements to Raney copper methanol synthesis catalysts through zinc impregnation. I Electron microprobe analysis 75
